DestinE Platform

How to join the DestinE Platform ecosystem

The DestinE Platform is the entry point to DestinE data and services. It provides cloud-based services for viewing, processing, and visualising **DestinE data**, including simulations from the Digital Twins initially focused on weather-induced extremes and climate change adaptation. Additionally, the platform integrates a variety of datasets from European Earth observation providers and socioeconomic data sources.

Implemented by **ESA**, the DestinE Platform is a key component of the Destination Earth initiative, alongside the Digital Twin Engine and Digital Twins — developed by **ECMWF** and deployed on EuroHPC supercomputers — and the Data Lake, managed by **EUMETSAT**.

Join as SERVICE PROVIDER

Benefits

- Increase your visibility by reaching a broader audience, including major European agencies and organisations
- Connect with a network of providers to enhance your credibility and trust
- Access state-of-the-art infrastructure to drive innovation
- Leverage unique DestinE data for cutting-edge services

Onboarding

1 Request

submit your service information and acknowledge the DestinE Platform terms and policies.

2 Evaluation

your service will be assessed based on credibility, alignment with DestinE objectives, interoperability, and attractiveness.

3 Integration

participate in integration and testing activities before your service is published and made accessible to all users.

Join as UPGRADED USER

Benefits

While all registered users can access a selected range of open services, the **Destination Earth System user access policy** allows selected categories of users to upgrade their access level.

Upgraded users gain full access to all advanced features and services, enabling them to work with DestinE data to help improve and develop the system.

Eligibility

Categories eligible for upgraded access include:

- **Public authorities** of EU Member States and Digital Europe Programme Associated Countries
- Public **Academia and Research** teams contributing to the development of DestinE through EU-funded research or related national programmes.
- EU **SMEs & start-ups** involved in the implementation or enhancement of DestinE
- Selected **third country public authorities** aligned with EU international commitments.

Join as a FEDERATED ECOSYSTEM

The Destination Earth System enables federation with external ecosystems and identity management systems.

Seamlessly access DestinE Platform services, resources, and community using your ecosystem credentials or expand your audience by allowing the DestinE community to access your ecosystem.
